COLLABORATIVE DESIGN

RESPONSIVE WEB DESIGN

SERVER ADMINISTRATION KNOWLEDGE

VIDEO PRODUCTION

WORK EXPERIENCE

Vancouver Coastal Health May 2018 — Present

Co-op: Web Developer

Working as a web developer in the Learning Technologies team at VCH taught me so much about creating websites in a professional environment. I worked closely with a UX / UI Design lead and an Instructional Designer to create multiple educational websites for various department within VCH. During my time here I was given the freedom to learn a full front-end web stack using Gulp.js as my main build tool, Sass as my CSS preprocessor and Jekyll as a static site generator.

TOOLS: GIT VUE JEKYLL GULP SASS

Fraser Health May — December 2017

Co-op: Web & Business Analyst

Working in a team of four, provided support for SharePoint 2007, 2010 and 2016. I not only maintained Windows servers, but developed new SharePoint based web applications using Visual Studio and C#. I also gained insight into working in a professional information technology environment.

TOOLS: C# HTML5 SHAREPOINT

ABOUT

I am a passionate web developer and designer with the ability to navigate team environments and an aptitude for communicating design ideas.

WEB EXPERIENCE

Human Computer Interaction Fall 2018

School Project: Front End Web Developer

Tasked with redesigning a user interface using HCI concepts taught in the course, my team of three worked to explore different UI for Soundcloud.com. We used techniques such as cognitive walkthroughs, affinity diagrams and keystroke analysis to create refine our design, collaborating over Figma.

TOOLS: VUE NUXT DIRECTUS FIGMA

Once we finished the UI mockups, I created the prototype implementation using Nuxt.js (an SPA framework built on top of Vue) for the front-end and Directus (a headless CMS) on the backend. The Headless CMS provided a RESTful API that I would call from Nuxt in order to populate the app with data. This was my first big leap into using Vue in a JAM stack and I really enjoyed the challenge.

DEVELOPER & DESIGNER

WEB EXPERIENCE

Creating Design Tools Spring 2019

School Project: Designer and Developer

In this 4th year course at SFU's SIAT Program, I worked with a partner to create a tool that would "help people be creative". We decided to create a glitch art creation tool. This tool works by running images through audio effects, creating unique and surrealist distortions. I opted to use Electron so I could bring my current web development skills to the desktop. During the app's development I learned a ton about the web audio API and Electron.

TOOLS: ELECTRON VUE FIGMA

FREELANCE WORK Fall 2012 — Present

Work Experience: Web Design + IT

Working with various companies and clients over the years has taught me how to communicate with non-programmers and non-designers, as we work together to implement their vision.

CLIENTS: itotem.ca langleytaxi.stuible.com

SERVICE EXPERIENCE

Earl's Tin Palace April 2014 — September 2016

Line Cook

Cooked in an intense and fast-paced environment with an emphasis on food quality. Lead a group of appetizer chefs as we work together to get food to the guest with speed and precision.

INTERESTS

Whether it's programming or design, I'm looking for a creative outlet. My hobbies are no different so when I'm not coding you'll find me writing and producing music or, at the very least, finding new and usually bizarre tunes to listen to.

VOLUNTEER WORK

NSWC Nov 20th — Nov 21st 2012

Volunteer Experience: Server Administration

Volunteered at the North Shore Womens' Center setting up donated computers as public use machines for anyone in need of internet or computer access; Migrated file server to a newer computer. This experience taught me a lot about the problems you face in real world IT work and improved my troubleshooting skills.

EDUCATION

2014

Undergrad in SIAT

Sept 2014 — Present

Currently working on my BA at Simon Fraser University where I have had many opportunities to work in design teams that must communicate ideas in large scale presentations.

2013

Digital Media Academy

Sept 2011 — June 2013

During grade 11 and 12 I was enrolled in the Digital Media Academy at Argyle; a program where students have the opportunity to get real world experience in the field of Digital Media. I was able to code a video game with a small team and learned a lot about teamwork and what it takes to create video games.

2011

2008

Argyle Secondary School

Sept 2008 — June 2013
